

Borçelik Environment Policy

■ Brief

This policy defines the environment-related principles followed within the scope of all our activities, including the products and services we offer as Borçelik.

Environment Policy

At Borçelik, we undertake to act in accordance with the following principles within the scope of all our activities including the products and services we offer. We do this by:

- Researching and applying the best available techniques and performing beyond compliance with the legislation in line with the goal of adhering to the relevant environmental legislation and all other commitments of the company;
- In line with the Lifelong Assessment approach, systematically monitoring and evaluating all our environmental risks and impacts, natural resource consumption, raw materials and auxiliary materials, products, packaging and processes, from procuring raw materials to final disposal;
- Planning waste prevention, waste reduction, reuse and recycling activities in line with achieving the targets of reducing our resource consumption, using our resources efficiently and preventing pollution;
- Continuously monitoring our emissions to the air, water and soil and planning further studies to reduce our environmental impact and to improve our performance in this regard;
- Taking the necessary measures to prevent uncontrolled releases to the air, water and soil and reviewing our performance and plans at regular intervals;
- Setting, measuring and monitoring our environmental impact, performance, goals and objectives and aiming for continuous improvement in this context;
- Being aware of the areas protected by national and international legislation or agreements, identifying and evaluating our impact and planning work aimed at reducing the stress on these areas;
- Planning activities towards preventing biodiversity loss and increasing the biodiversity in our areas of influence;
- Monitoring the chemicals used, eliminating or replacing harmful ones with those that are less harmful and planning a roadmap towards reducing the environmental effects of chemicals;
- Conducting open and transparent communication about the environment with our employees and all our stakeholders, and planning further activities to raise environmental awareness.
