

Borçelik Water Policy

■ Brief

This policy defines our water-related principles within the scope of all our activities, including the products and services.

Water Policy

At Borçelik, we undertake to act in accordance with the following principles within the scope of all our activities, including in terms of the products and services we offer. With the aim of adhering to all relevant legislation and other commitments made by the company, and to go beyond simple compliance with the legislation, we:

- Define our water-related impact area by taking into account our operational boundaries, water resources, receiving environments and the basins where we carry out our business, and establish an appropriate water balance and review it regularly.
- Identify and evaluate the effects of all our environmental activities on water, and work to minimize negative effects by researching and applying the best techniques.
- Determine, measure and monitor our water-related performance, goals and targets; reduce the stress on water resources; use water efficiently; increase the efficiency of monitoring systems; reuse treated wastewater; and strive to emit in ways that least affect the receiving environment in order to improve our performance.
- Cooperate with our stakeholders to eliminate common water problems that may affect our water basin with the awareness that the problems in water management can only be solved with the participation of stakeholders who use the basin jointly use the basin.
- Conduct open and transparent communication about water, ensure the participation of our employees and all our stakeholders, and plan activities to raise water awareness.
